SUMMARY

Experienced Full-Stack Developer with expertise in Laravel, Flutter, Java, and WordPress plugin customization. Proven ability to develop and maintain scalable web/mobile applications and provide production-level support, ensuring seamless user experience and fast issue resolution.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

SherShah Engineering College Sasaram

📅 09/2016 - 12/2020   📍 Sasaram, India

EXPERIENCE

Full Stack Developer

Aashtech Innovation Pvt Ltd

📅 02/2024 - Present   📍 Ghaziabad, India

- Developed and maintained RESTful APIs and backend services using Laravel and Java.
- Designed and optimized relational databases (MySQL, PostgreSQL).
- Implemented authentication, authorization (JWT, OAuth), and role-based access control.
- Integrated third-party APIs, payment gateways, and cloud storage solutions.
- Built cross-platform mobile applications using Flutter.
- End-to-end development of web and mobile applications, ensuring high-quality code and best practices.
- Integrated real-time features using Firebase and WebSockets.
- Customized WordPress plugins to enhance website functionality.
- Developed custom WordPress plugins tailored to specific business requirements.
- Collaborating with teams to deliver scalable, user-friendly solutions.

Application Developer

Aashonline IT Company

📅 01/2022 - 02/2024   📍 Ghaziabad, India

- Developed and maintained mobile applications using Flutter, and Java.
- Designed and implemented RESTful APIs, ensuring secure and efficient data exchange.
- Integrated third-party APIs, payment gateways, and cloud services for seamless application performance.
- Collaborated with designers, backend developers, and project managers to deliver high-quality solutions.
- Conducted testing, debugging, and performance optimization to enhance application efficiency.

Founder & Full Stack Developer

MrGrofer

📅 08/2020 - 12/2021   📍 Dehri, India

- MrGrofer was a startup initiated to support local authorities in assisting the public during the COVID-19 pandemic by enabling seamless ordering of food, groceries, vegetables, and medicines.
- Implemented a responsive, mobile-first approach to ensure a seamless user experience across devices.
- Designed and integrated backend systems using Core PHP and Java for secure order processing.
- Optimized database structures (MySQL, Firebase) for handling high-volume transactions.
- Collaborated with local vendors and authorities to facilitate on-demand delivery solutions.
- Ensured application security, performance, and scalability to support real-time transactions.

PROJECTS

NCCF - National Cooperative Consumer's Federation of India

Developed a website and application using Laravel and Flutter for managing vendors and distributors, including live vehicle tracking.

Widow Divyang Old Age Pension (UP Pension App)

Developed an application for the Uttar Pradesh State Government using Java to promote government schemes related to Widow, Divyang, and Old Age Pension.
